Kloppenbergl Ice Dispensers

- Ice by the bag full or container full.
- Eliminates back breaking scooping and shovelling ice.
- 100% stainless agitator to minimize ice bridging (in dispense section) and Auger for easier dispensing (Disp-1000 has dual-agitators for better ice management).
- Modular/sectional design makes delivery and installation easy.
- Minimal foot pedal actuation makes fill ups easy. Includes shelf for supporting bags or buckets.
- Safety interlock switch on door for safety - it won't run when door is open.
- 1/2 horsepower motor with built-in thermal overload protection. 8.8 amp/115 V/60 Hz/1 phase, 4.4 amp/220 V/60 Hz/1phase.
- Easy clean stainless steel tubular base maximizes sanitation and is unsurpassed in strength.
- Access door in storage area permits easy access for scooping ice and ice breakup in the event of bridging. 15" x 19" door opening.
- Bin top is cut to suit the icemaker of your choice and is fully gasketed.
- ETL Certified.
- Foot pedal for easy, CLEAN, "hands free" dispensing.
- Saves time - dispenses 2 lbs. per second.
- Makes bagging easy and profitable.
- Reduces liability, injuries, and spilling.
- Bags or bulk at your service.

Ice Management System

(Safe, sanitary ice dispensing and relocation)

- Combines baggers (bags) with shuttle system (carts) under one or more ice makers.
- Ideal for use at arenas, stadiums, assembly complexes, convention centres, etc.

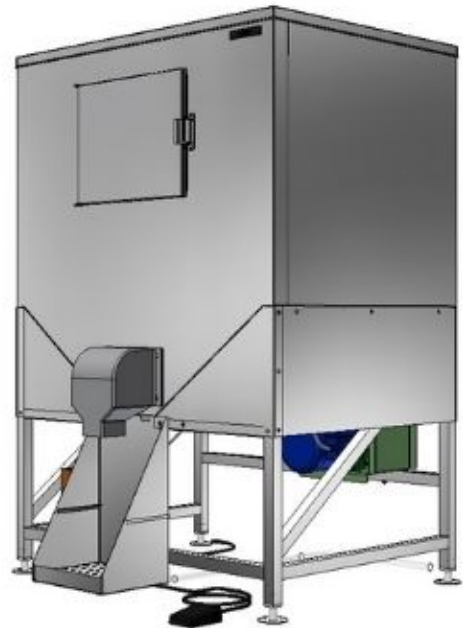

DISP500

DISP500

- Front and side panels.
- Front access door
- Adjustable stainless-steel feet
- Stainless steel shelf for bagging ice
- 250kg capacity
- Size 762 x 1334 x 1630 (mm)

DISP1000

DISP1000

- Front and side panels.
- Front access door
- Adjustable stainless-steel feet
- Stainless steel shelf for bagging ice
- 450kg capacity
- Size 1200 x 1334 x 1630 (mm)
